

Pressure Reducing Valve Manufacturer in Brazil.

South American Valve is the largest [Pressure Reducing Valve Manufacturer in Brazil](#). We deliver our products in Argentina, Brazil, Columbia, Peru, and Chile. This valve (PRV) is a type of valve used to regulate and control the pressure of a fluid in a system. It is designed to reduce a higher inlet pressure to a lower, more manageable outlet pressure. These valves are widely used in various industries and applications where precise pressure control is critical.

South American Valve is the best [Pressure Reducing Valve Manufacturer in Brazil](#). Whether you need to reduce high inlet pressures or maintain constant outlet pressures, our pressure reducing valves provide efficient flow control, enhance system performance, and protect downstream equipment. Discover the benefits of our advanced pressure reducing valves and how they can optimize your fluid system operations.

Benefits:

- Extreme Temperature Resistance
- Precise Flow Control
- Enhanced Sealing Integrity
- Corrosion Resistance
- Safety and Reliability
- Customization Options
- Compliance with Standards

Applications:

- Water Distribution Systems
- HVAC Systems
- Industrial Processes
- Steam Systems
- Fire Protection Systems
- Irrigation Systems
- Compressed Air Systems
- Fuel Gas Systems

Parts:

- Body
- Trim
- Stem
- Actuator
- Seat

- Bonnet

Industries:

- Aerospace and aviation
- Power generation
- Process industries
- Water and wastewater treatment
- Oil and gas

Description

- Available materials: Ductile Iron, WCB, WCC, WC6, LCB, LCC, SS304, SS316, Cast iron
- Size: 1/2" to 24".
- Nominal Pressure: PN10 to PN100.
- Class: 150 to 600.
- Ends: Threaded, Buttweld, Socket weld, Flanged.
